CAREER OBJECTIVE

With four years of experience in the networking field, including three years at Myanmar Net specializing in FTTx, infrastructure network quality control, Point-to-Point installation, and NOC, I am eager to contribute to the growth and success of your organization. I later served as a NOC Engineer at Marga Global Telecom. I am dedicated to continuous learning and professional development, striving to make a positive impact through hands-on experience in network support, installation, and analysis for LAN/WAN/MAN systems.

Proficient in Layer 2 & 3 protocols, data center management, and various monitoring tools (NMS, PRTG, Libre, Observium, IPAM), I continuously seek to enhance my skills to maximize efficiency and effectiveness within the company.
